

Investigate the News

PLACES along the WATER

Search maps and your newspaper. Identify places in your community and state that developed along the water. What do you find?

Read print and/or Web versions of newspapers from the places you identify. What references do you find to bodies of water? What evidence do you find that the newspapers serve communities located near the water?

Conduct research and **SHARE** what you find out about the development of one or more of the places located on water.
