Subject: TE-111 License Plate Reader

Good afternoon. Updates to TE-111 are published and require signature in PowerDMS. Please read the policy in its entirety to ensure you understand it fully. The policy requires a valid CAD incident number or case number to be entered for every LPR search in any of our LPR systems (Flock, Evidence.com). This requirement is mandatory and applies to all searches without exception. Users are responsible for ensuring the correct number is entered at the time of the search. Audits begin immediately, and failure to comply with this policy, including conducting a search without entering a valid CAD or case number, will result in disciplinary action. Additionally, users are not permitted to add plates to agency-wide hotlists. Requests must be sent to the Crime Analysis Unit. If you have questions about the policy or its requirements, address them with your supervisor before conducting an LPR search. Thank you.
